*Letter of Support for project “Optimization of sustainable alien plant management in bioeconomy context (Bio4Alien)”*

On behalf of Salaspils Municipality, I confirm that the idea of Bio4Alien project would give an input in sustainable alien plant management, create the model for invasive plant conversion into value added products, reducing environmental burden and ecological footprint (land, carbon, water, materials), and solve food, environment and energy nexus. This would also be a key aspect for the sustainable alien plant management strategies at municipal level.

Salaspils Municipality and is open to take a part in meetings and share opinion about project intermediate and final results. Carrying out the project will give an input not only on regional invasive plant management, but on also strengthening the cooperation between municipality and scientific institution. We believe that project results would be meaningful for management and optimization of invasive species but also later on use, this methodology on agricultural plants is a great advantage. In the same time, it is a great opportunity to promote knowledge on bioeconomy.

Mayor of Salaspils Municipality

Raimonds Čudars

**About support**

RTU, Institute of Energy Systems and Environment are introduced us with idea for Bio4Alien project, we do support this idea and believe that it has an opportunity to promote sustainable use of specific resources, that is deliberately eradicated and becoming a waste. As well as one of eradication method in Latvia is used chemical method, which can be harmful for environment and climate. If within this project, new sustainable management system is provided, whereas result financial advantage is found, it could be an innovation not only in national level, but also a contribution on European and global level.

Preiļi municipality support the idea of Bio4Alien project implementation and are interested to participate in meetings about project intermediate and final results. As well as building an alliance.

Your sincerely,  
Chairperson

Maruta Plivda
