Support Letter

Dear Madam/ Sir,

Preili municipality is aware of the project proposal “**Smart CO₂ VALley: Effective Valorisation of CO₂ for Decarbonised Regional Development**” to be submitted by the Institute of Energy systems and Environment of the Riga Technical University to the Latvian Council of Science on 19 August 2019 within the Fundamental and Applied Research Projects call.

The proposed project “Smart CO₂ VALley” focuses on develop of a roadmap to decision makers on effective valorisation of CO₂ in regions of Latvia in environmentally sounded, resilient and business based (profitable high added value products) manner in connection with low-carbon circular economy principles.

Preili municipality is familiar with other successful projects from this Institute and know that results from this project will be useful for practical implementation.

As a consequence, **Preili municipality** hereby expresses the support to the “Smart CO₂ VALley” project proposal and will follow up the evolution of the project, in particular will:

- exchange the results of the project in the various national context;
- contribute to disseminate project results;
- participate to stakeholder activities during the time of the project.
- gaining new knowledge on decarbonisation of region and sustainable valorisation of CO₂.

Yours faithfully,

Chairperson

Maruta Plivda
