LETTER OF SUPPORT TO THE PROJECT

On behalf of Jelgava city municipality institution "Jelgava municipality Operative Information Centre", I confirm that the project "Strengthening Climate Resilience of Peri-Urban Area by Promoting Nature Based Solutions for Agricultural Sector" would be suitable for application of its results in policy planning and development of disaster risk reduction strategies with consideration of climate adaptation issues on local level. The assessment tools and platform enabling evaluation of disaster risk strategies in context of climate adaptation and sustainability in the urban context will be a valuable asset for municipality decision-makers and planners dealing with flood risk reduction.

"Strengthening Climate Resilience of Peri-Urban Area by Promoting Nature Based Solutions for Agricultural Sector" project proposal will be applied for Latvian Council of Science call for Fundamental and Applied Projects 2019 with number Nr. lzp-2020/1-0234 under the science field of Agricultural sector.

We will be pleased to support the project consortium with our feedbacks in terms of interviews and towards the validation and potential testing of the main outcomes and tools developed by project scientific group.

Yours sincerely,

Gints Reinsons
Head of Institution

Rīgā
