Financing Energy Efficiency in Baltic countries: lessons learned and future outlook

Within the framework of the EU Green deal which aims to transform EU economies and achieve climate neutrality by 2050 and Recovery and Resilience Facility in the context of national energy and climate targets, a sufficient amount of investment in energy efficiency, renewable energy projects and innovative technologies are among the most important issues to tackle.

Therefore, in the framework of the project CIC2030 (Climate Investment Capacity 2030) workshop is organized to bring together policy makers, project developers, researchers and financiers to exchange on lessons learned and discuss future perspectives on energy efficiency project financing.

Date: February 23, 14:00 – 16:30

Place: On-line. Please register [here](#).
